

Showcase Your Commitment to Oncology Professionals and Cancer Patients.

Sponsor the unique new interactive education tools they want for their patients.

The award winning *What's Next for My Life?*™ *Cancer Book Series* provides what oncology professionals often can't – professional support from another survivor.

Advocate for survivorship and quality of life with these innovative tools, the *Companion Journal for Cancer Patients*,™ and the *After Treatment Ends LifeBook*, currently used in over 20 hospitals.

Stand out from your competitors by reducing the burden on oncology professionals. Start a lifelong relationship with patients, whose journals are a legacy of their experience. One of the most powerful support tools for a cancer patient is another survivor. This book brings the survivor to the patient. Thanks to you.

“The survivor insight and wisdom, combined with the journaling prompts and compelling visuals are unique, effective tools for our patients.”

— Phil Fusca MSW, Co-Chair, Southeast Florida Cancer Control Collaborative, sponsors of both books for multiple cancer treatment centers and support organizations.
